Brebes, Indonesia

A vocational high school graduate in Computer and Network Engineering (TKJ) with a strong technical foundation, I currently have experience as IT Support with a deep understanding of infrastructure, troubleshooting, and user needs. Determined to transition into software development, I am actively building my skills as a Full-Stack Developer by mastering modern technologies such as HTML, CSS, JavaScript, React.js, and Node.js.

Currently, I am enrolled in a Full-Stack Web Developer bootcamp to deepen and refine my technical abilities in a structured manner. I am enthusiastic about translating my technical understanding from the support world to build scalable, efficient web applications with smooth user experiences through mature, responsive design.

As a meticulous, fast-learning, and solution-oriented professional, I possess a strong commitment to contributing within a dynamic development environment. I am ready to bring my dedication, technical mindset from IT Support, and strong passion for learning to secure a full-time role as a Full-Stack Developer.
